DEFRA (Ref: MO43) For Weather Forecast Planning Issued on Saturday, 18 September 2021 at 01:56 local time

Air Quality Forecast for the UK

Issued by the Met Office

Today: Mainly Low air pollution levels are expected across the UK, perhaps very locally Moderate in parts of the Southeast. Expected light winds here and possible early fog may hamper the dispersion of locally-generated pollutants.

Tomorrow: Mainly Low air pollution levels. Areas of Moderate pollution are perhaps possible in parts of eastern England, with light winds importing some Continental pollutants to add to those generated locally.

Outlook: Increasingly breezy and unsettled conditions across much of the UK should help mean that air pollution levels become generally Low into the new working week.
